

Merry Christmas from everyone at Edmonton Green Shopping Centre!

Improving Edmonton Green

You may have spotted that we are currently making some improvements to the shopping centre, including the creation of a brand-new playground and community garden which we recently unveiled. We therefore wanted to provide an update of what we've been doing to make the centre better for you.

What you told us

At the beginning of this year we carried out a survey to find out what improvements local people would like to see to the centre. We received a fantastic response with a total of 298 people taking part in the survey. When asked what you would like to see improved at Edmonton Green Shopping Centre, this is how you responded.

50%
wanted **better lighting**

49%
wanted **improved security**

47%
said they'd like the centre to have a **refreshed look**

47%
wanted **better toilet facilities**

42%
wanted the centre to be **cleaner**

40%
wanted **better play areas**

34%
asked for more **greenery & planting**

33%
wanted more and **better bins**

24%
asked for **improved furniture**

23%
asked for **better signage**

What we have done so far

The entire centre has received a fresh lick of paint to contribute to the desired refreshed look.

We have added new street furniture including benches and bins.

New and improved lighting is being installed around the centre.

A brand-new community garden has been created, with the help of Churchfield Primary School, to increase the amount of greenery and planting.

We have built a brand-new children's playground, which opened to the public in November and includes a new climbing frame, slide and swing set.

A new logo has been designed and we are updating all our signage with this modern branding.

We have installed brand-new toilet facilities.

We have increased the level of security to make it a safer place for all. This has led to a 48% decrease in shoplifting incidents and 9% decrease in total incidents across the shopping centre in 2019, compared to the previous year.

The future of Edmonton Green

We are starting to develop proposals for the centre and the surrounding area. This includes making further improvements, but also looking at what other uses (such as new homes, shops, restaurants and public spaces) would be appropriate for this area.

We want to understand what you would like to see at Edmonton Green and so we will be holding a series of events in the centre over the coming months which will enable you to tell us what your priorities are.

Details of these events will be advertised in due course, but if you have any questions or would like to find out more about what is happening at the shopping centre in the meantime, please contact us:
